Product Family MAS 73x / 83x

Type	Item	Life-Cycle		Description
CPU 831-TG	44310201	P5 P6 P7 P8	2018 - 2028 2028 - 2030 2030 - 2033 2033 - 2038	To ensure module availability, we recommend using the CPU 831-TG only for existing projects or option projects. For new projects, we recommend the use of the successor module CPU 833-TG.
ESM 801-TG	44130102	P5 P6 P7 P8	2017 - 2027 2027 - 2029 2029 - 2032 2032 - 2037	To ensure module availability, we recommend using the ESM 801-TG only for existing projects or option projects. For new projects we recommend the use of the successor modules ESM 83x-Tx/xxx.
CRS 731-TG	44130021	P5 P6 P7 P8	2018 - 2028 2028 - 2030 2030 - 2033 2033 - 2038	To ensure module availability, we recommend using the CRS 731-TG only for existing projects or option projects. For new projects, please contact Product Management.
TL 73x	4457012x	P7 P8	2018 - 2021 2021 - 2026	Due to the new design of the terminal blocks (TBA), the terminal locks ("TL") also had to be replaced. For obsolescence reasons, the old TLs can no longer be produced. The new TLs 73x-xx, including new TBAs (see the system manual), serve as replacements.
MVB 831-T/ExD	44330003, 44330004	P5 P6 P7 P8	2019 - 2029 2029 - 2031 2031 - 2034 2034 - 2039	To ensure module availability, we recommend using the MVB 831-T/ExD only for existing projects or option projects. For new projects, we recommend the use of the optimized successor module MVB 831-T/ExD/01.
