## The information obligations acc. to Art. 33 of the REACH regulations

Selectron Systems AG supplies you with automation solutions for rail vehicles. Being located in a non-EU country, we are not automatically subject to the REACH information obligations. However, we will fulfil the information obligations towards our customers in accordance with Art. 33 of the REACH regulations in the event that a product that we are supplying does contain a substance of very high concern (SVHC) in a concentration of more than 0.1 percent by mass.

The list of SVHCs is published on the website of the European Chemicals Agency (ECHA) at [http://echa.europa.eu/chem\\_data/candidate\\_list\\_table\\_en.asp](http://echa.europa.eu/chem_data/candidate_list_table_en.asp). We take these information obligations extremely seriously in our own interests and in order to achieve a high level of delivery and product safety. We comply with the requirements in Art. 33 of the REACH regulations by means of the following procedure:

- We are in contact with the suppliers of the relevant raw materials that are processed in our products. We oblige them to provide us with binding information about whether the listed SVHCs are contained in the raw materials with a concentration of more than 0.1 percent by mass.
- The EU suppliers of products that are processed in our products on the relevant scale are obliged to inform us spontaneously and without delay if the products they are supplying contain an SVHC to a concentration of more than 0.1 percent by mass. In the event that we receive information in this regard from our suppliers and therefore it is drawn to our attention that the threshold of 0.1 percent by mass for an SVHC will also be exceeded in our products, please rest assured that we will inform you immediately.
- In addition, we require all relevant EU suppliers to give us written confirmation that they are indeed complying with this statutory information obligation.
- We make separate agreements with all non-EU suppliers of products that are processed in our products to the relevant extent, because these suppliers are not automatically subject to the REACH information obligations. Therefore, we instruct our non-EU suppliers to inform us in writing that the supplied products do not contain any SVHCs in concentrations > 0.1 %.

Please do not hesitate to contact us if you have any further questions regarding implementation of the REACH regulations in our company. You are welcome to contact our employee who is responsible for questions relating to REACH, Mr. U. Ryf, by e-mail at: [urs.ryf@selectron.ch](mailto:urs.ryf@selectron.ch).

Yours sincerely  
Selectron Systems AG
